7. Problems fixing

If the device can not connect to the server in your first time of using, and on the APP shows the device is out of line. Please check the following conditions:

- 1) Your SIM card is 4G and network is normal or not.
- 2) Data flow service is turned on and normal or not.
- 3) The ip and port, or the IMEI is correct or not. The IMEI code on the device shall be same as the factory code. You can get the code by send message **pw,123456,ts#** to the watch. (The watch has a SIM card. And the message is texted **in ENGLISH**).
- 4) If there is still not working, please ask the seller for more details and help.
- 5) If you can not register, there are 2 problems usual:
 1. The code of device does not exist or it has registered before, under this condition you must ask for your seller for help.
 2. Account has registered before. Under this condition, you just change this account is OK.
